

Doing Wind Right: Land-based Wind Power in Maine

Forum on March 31, 2011
Fields Pond Center, Holden, Maine

-Free-
Public Invited

Is it possible to develop land-based wind power as a renewable energy source for Maine while protecting the state's ecological health, natural heritage, and scenic beauty? Join us to hear a panel of speakers representing environmental groups and the wind industry discuss wind as an energy source and all that it may entail, controversial and otherwise. The panel includes David Publicover, AMC's Senior Staff Scientist and wind power expert, Ted Koffman, Maine Audubon's new Executive Director, and Matt Kearns, First Wind VP for Development. The forum will be moderated by Maine State Representative Bob Duchesne, Chair of the legislature's Natural Resources Committee. The program is co-sponsored by AMC Maine Chapter and Maine Audubon. Details at amcmaine.org/calendar/ or email education@amcmaine.org.

March 31, 2011, Thursday, 7-8:30 pm
